

Support & Migration for Legacy Systems

Extending the life of your legacy system from where ever you are in your journey.

Keep critical systems running with expert support and monitoring.

Eliminate hardware dependencies with modern virtualization.

Transform legacy infrastructure into secure, scalable, future-ready systems.

Support

Support and monitoring for aging systems that still power your business operations.

Hardware

VAX, Alpha, & Integrity Servers
Oracle Sparc Systems

Software & Operating Systems

OpenVMS
Oracle Solaris
Parsec OSES

OpenVMS

Emulation

Run legacy applications without legacy hardware through advanced emulation services.

Emulation Platforms

vtVAX, vtAlpha, vtSparc

Application & Database Support

Programming support to run legacy applications and databases.

Programming Languages

C/C#, Pascal, Fortran, Java

Database

RDB, Oracle Database

Platform Migration

Complete code migration and modernization of services to current platforms.

Migration Services

VB6 to .NET Migration
SQL Database Migration
GE 90/30 Upgrades
AB PLC 5, SLCs, Siemens, Square D

Modern Technologies

Industrial Automation
ControlLogix PLCs
Siemens Simatic S7 PLCs
Emerson PLCs
Wago

Modern SCADAs

Movicon
Rockwell
Ignition
Avena Edge

Ready to Modernize Your Legacy System?

Let's discuss how we can support your infrastructure today and prepare it for tomorrow.
